CHARACTERISTICS OF THE 2022 VINTAGE

~ Exceptional growing season conditions:

- * A mild and dry winter.
- * A frosty start to spring with a week of cold weather marked by five “spring frosts”, with temperatures falling to -4°C on 3rd April 2022, thankfully with no severe damage.
- * A very summery month of May, which speeded up the growing cycle and brought on early flowering (between 10th and 25th May), in optimal conditions.
- * The month of June came with the first spell of very high temperatures, as well as rainfall (69 mm) that was to prove crucial with the dry weather in the weeks that followed.
- * Summer was very hot and extremely dry (one day: 12 mm in July, three days: 20 mm in August).
- * This radiant weather meant the ripening of the grapes stayed ahead of scheduled and resulted in the earliest harvest on record (two weeks earlier than usual) starting at the beginning of September.

~ The harvested grapes were very small, requiring very gentle handling during winemaking, resulting in slow and prolonged extraction (a vatting period of 30 days).

~ The wines are aged in Bordeaux barrels (“barriques”) (225 l), 80% new and 20% second-fill, for approximately 18 months.

A FEW KEY FACTS

~ A vintage that was overall warm and very dry (473 mm from 1st November 2021 to 31st October 2022),

~ Sustained heat and drought throughout the season (winter, spring and summer),

~ Very little disease pressure in the vineyard,

~ The sanitary condition of the grapes was excellent: small berries, skins concentrated with lots of tannin, and little juice...

~ Weather conditions that:

- * created concentration in the ripeness of the grapes (colour, power, intensity of the aromas),
- * preserved the finesse of the aromas,
- * resulted, however, in “low” yields, generally lower than previous vintages.

~ Five keys to understanding the resilience of the Clinet vines:

- * the recent succession of warm and dry vintages (notably 2016, 18, 19 and 20),
- * the drought that set in from the very beginning of the 2022 growing season,
- * a good diurnal range with cooler night conditions during the very hot weather,
- * a clay terroir that is cool and provides the vines with a constant supply of water,
- * the experience and ability to adapt of our team of experts, when faced with these weather conditions (restricted leaf removal, green harvesting, grass cover maintained between the rows...),

~ A Vintage of extremes:

- * drought,
- * daytime heatwaves,
- * early harvests,
- * levels of tannin concentration,

~ A thrill to observe and taste (rich, intense and balanced all at once)!
