

## CHÂTEAU BEYCHEVELLE

### A first report

We are now at the « half-time » of the harvest and thus have a good insight of the 2015 vintage.

After an excellent cultural season, we have just finished picking the Merlots this Tuesday 29th September and the harvest conditions have been optimum. The alcohol degree so far is up to 14%, sign of a well-accomplished maturity. Even though we still have to wait, the yields are to be superior to those of the last five years. The weather conditions and the first analysis of the grapes encourage us towards an excellent vintage.

Without a doubt, 2015 will be part of the greatest successes of those last 15 years.

We are now harvesting the Cabernet Sauvignon plots. Their harvest should be completed at the end of next week with weather previsions still very satisfying.
