

RIEUSSEC

—
SAUTERNES

L'ART DE LA MÉTAMORPHOSE

It is only in Sauternes that botrytis can develop, giving Rieussec its unique richness. This noble rot meets our grapes to create a delicate osmosis that we reveal by harvesting each grape at the ideal moment. Once bottled, our wine starts its life cycle, drinkable from the

earliest stage to the longest aging potential : when kept chilled once opened, it can be enjoyed for several weeks without deteriorating and can match a thousand flavours and occasions from noon to midnight.
